DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 26-32 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-49 of U.S. Patent No. 6,718,965. Although the conflicting claims are not identical, they are not patentably distinct from each other.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3749

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 26-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Gilliom (4,108,139), which shows all of the claimed limitations, including among other things,

26. An oven 10 comprising: an oven cavity 17; a fan compartment 50 adjacent a wall 20 of the oven cavity and housing a fan 51 therein; a combustion box 35 located below the fan compartment; a tube-type gas burner 32 located adjacent and parallel (see at least fig. 3) to a front wall 31 of the combustion box, the front wall of the combustion box being proximate a front 21 of the oven cavity; a flue spout 39 configured to provide fluid communication between the combustion box and an inlet portion of the fan compartment (see at least fig. 2).

27. The oven of Claim 26, wherein a portion 41,57 of the inlet portion is open to the oven cavity.

28. The oven of Claim 26, further comprising openings 58 formed in a bottom wall of the oven separating the oven cavity from the combustion box (see at least fig. 1).

29. The oven of Claim 26, wherein a bottom wall of the combustion box comprises a rearward upward slope 37 (see at least fig. 2).

30. The oven of Claim 26, wherein the combustion box comprises a plurality of air inlet holes 58.

31. The oven of Claim 26, wherein the flue spout covers substantially the entire inlet portion of the fan compartment (see at least fig. 2).

32. The oven of Claim 26, wherein the flue spout covers at least half of the inlet portion of the fan compartment (see at least fig. 2).
